

Floor level and Flat Surface Linear forensic light source

The OR-GZJ30 is a compact linear forensic light source for illumination of flat surfaces at the crime scene or the laboratory. The light source provides a linear LED white light output suitable for detection of evidence on floors, gel lifts, windows and walls. The device is very compact and light weight. 2 versions are available with fixed power or brightness adjustable setting. This particular model does not come with a telescopic handle unlike the OR-GZJ40.

Key Specifications:-

Wavelength	White 400-700nm (5000K colour temperature)
Visible light power	36 Watt LED
Power adjustable	2 models available one with fixed power and one with user adjustable power setting
Battery type	Lithium Ion re-chargeable integrated battery
Battery operation time	>100 mins in continuous use
