# 1064nm Handheld Raman

# Part 1

## 1064nm Handheld Raman Spectrometer

# Raman Technology

### Optical design: spatial coupling optical path

### Detector: InGaAs (cooling: $-20^{\circ}\text{C}$ )

Circuit stability control

Thermal stability control

### Universal holders for sample

Different package thickness requirement

### Laser safety: Add laser safety valve

When the test is not prepared and the test head is not installed, if the test button is touched by mistake, the laser will not be emitted.

### High Signal Intensity(I)

Test condition :

Sample: Acetonitrile

Power:300mW

Time:3s

Con. Z(I)=Logo 1 × 11=Logo 2 × 1.5

### Low Signal Noise(N)

Test condition:

Sample: Acetonitrile

Power:300mW

Time:3s

Con.: 20Z(N)=Logo 2 (N)

### Low detection limit ( 1% alcohol)

**Why do we  
choose  
1064nm?**

# Part 3

## Why do we choose 1064nm ?

**Avoid fluorescence interference** of the test sample (substance itself, impurities),  
Solve the fluorescence challenges of traditional 785nm Raman

Sample 1: fluorescence interference , weak signal

Sample 2: All covered by fluorescence

Sample: Chili Oil

# Part 3

## Why do we choose 1064nm ?

Avoid **packaging material** fluorescence interference

Colored plastic bottles

Colored glass bottle

Colored film packaging

*The above 785nm band has fluorescence interference, 1064nm test has no fluorescence interference*

**Application  
Advantage ?**

## Law enforcement agencies

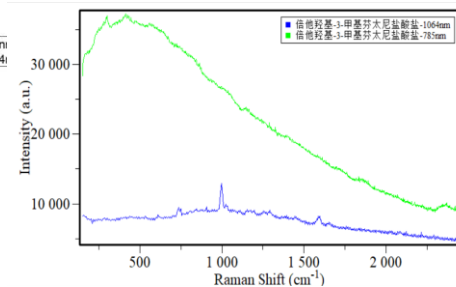

Customs department

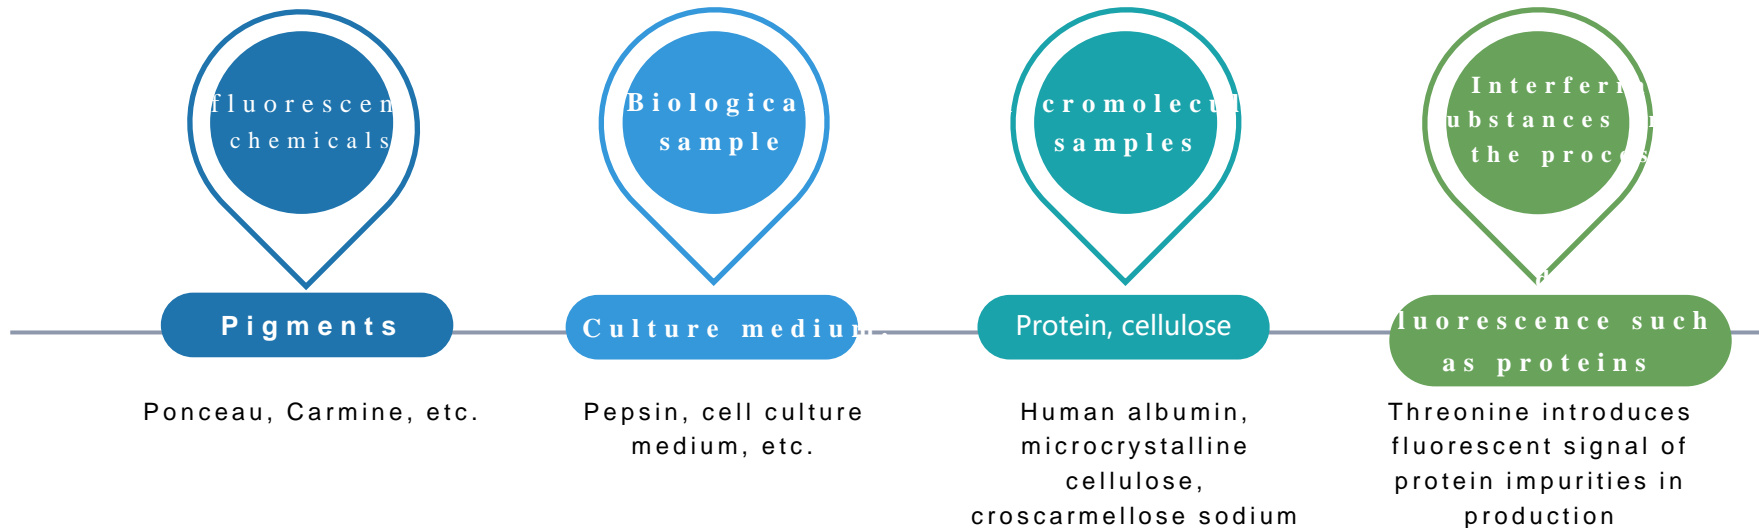

Public security department

emergency management

### Application of test samples in pharmaceutical production

# Specification

|                            |                                   |
|----------------------------|-----------------------------------|
| <b>Laser Wavelength</b>    | 1064nm                            |
| <b>Laser Output Power</b>  | ≤500mW                            |
| <b>Spectral Range</b>      | 200-2500cm <sup>-1</sup>          |
| <b>Spectral Resolution</b> | < 14cm <sup>-1</sup> @ 1262.339nm |
| <b>Connectivity</b>        | Bluetooth and Wifi                |
| <b>Certification</b>       | CE and ROHS                       |
| <b>Collection</b>          | Optics 10mm and 15mm focus lens   |
| <b>Laser Class</b>         | Class 3B                          |
| <b>Weight</b>              | 1.2Kg                             |
| <b>Size</b>                | 19.8*9.9*5.2cm                    |

*Thank you*
