

Floor level and Flat Surface Linear forensic light source with telescopic handle

A compact linear forensic light source for illumination of flat surfaces at the crime scene or the laboratory. The light source provides a linear LED white light output suitable for detection of evidence on floors, gel lifts, windows and walls. The device is very compact (the size of a mobile phone) and light weight.

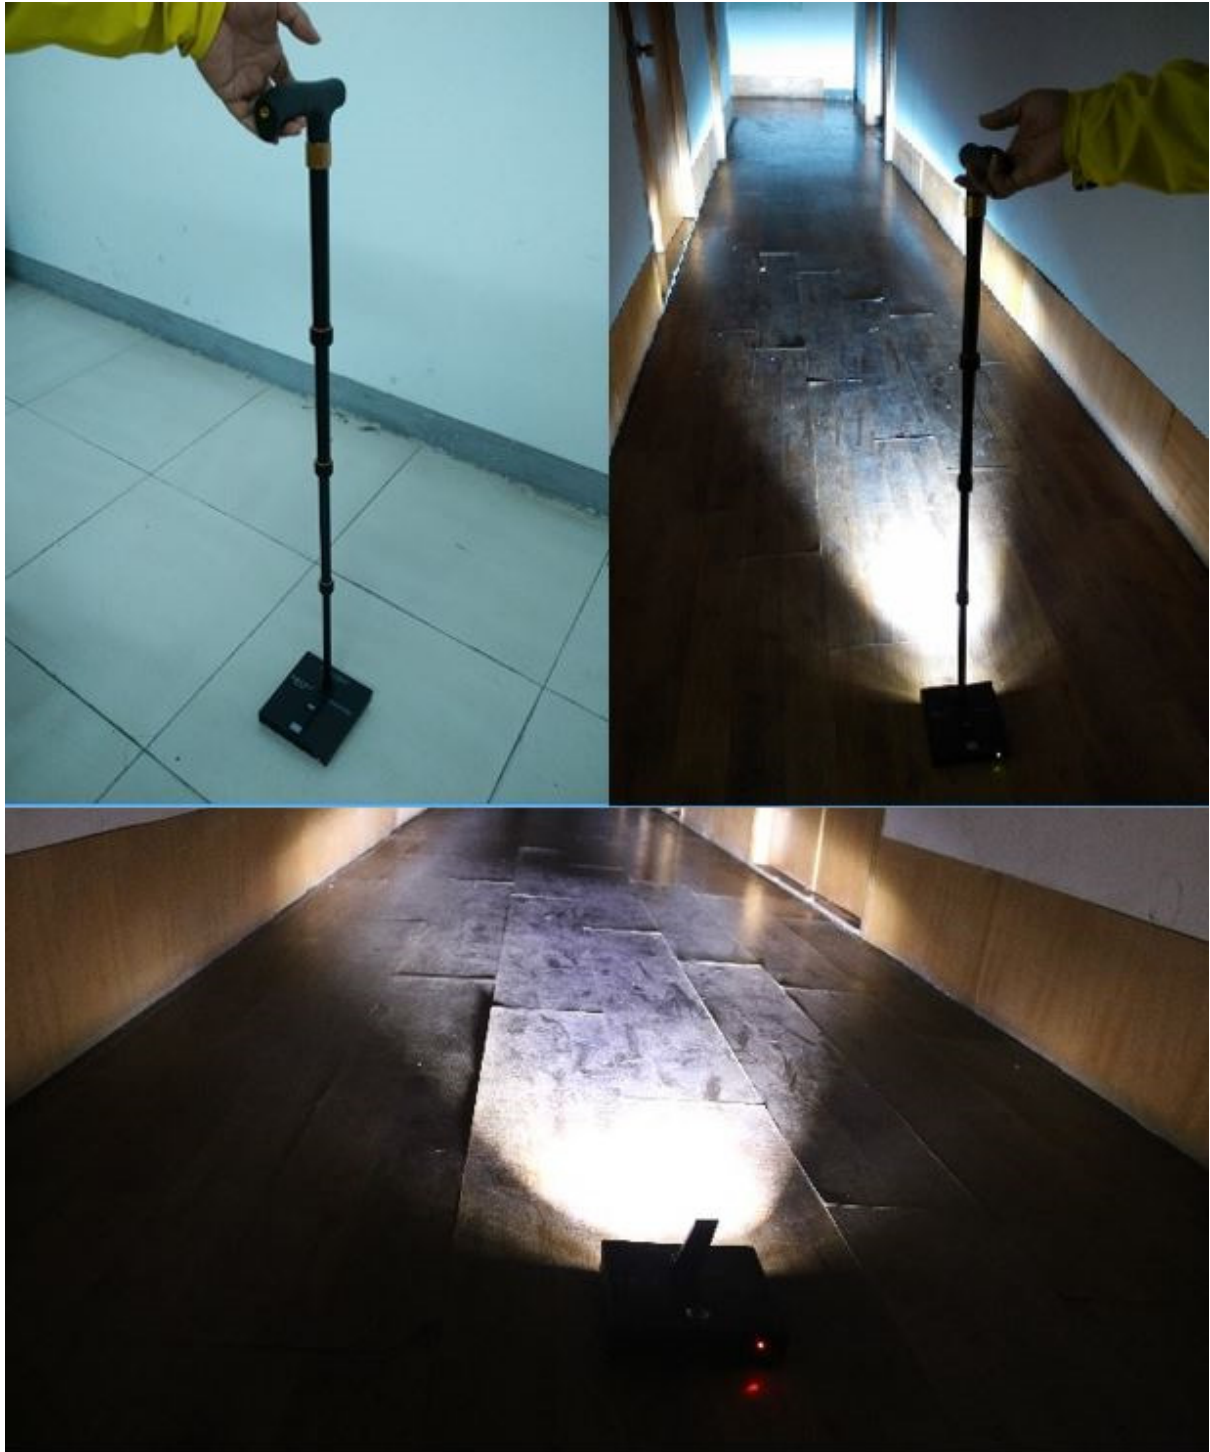

Key Specifications:-

Wavelength	White 400-700nm (5000K colour temperature)
Visible light power	30 Watt LED
Spot illumination	At 0.5 metres > 60,000 Lux At 1.0 metres > 17,000 Lux
Battery type	Lithium Ion re-chargeable integrated battery
Battery operation time	>60 mins in continuous use
Mains power	Can be directly operated also from UK/EU mains power
Dimensions	150 mm x 141 mm x 26 mm, robust with telescopic handle
Weight	0.75 kg

Applications:-

- Footwear mark examination on floors
- Fingerprints and ear prints on windows
- Footwear marks on Gel lifts
- Detection of listening devices within walls (detection of surface imperfections)

Provided in a Ruggedised carry case with UK or EU mains
charger plug
