

## Mobile document authenticator Regula 1120

**Automatic reading and authenticity verification of passports, IDs, visas, driver's licenses and other documents.**

**Can be connected to any mobile device via Bluetooth® LE and get integrated with Regula app.**

**Uses the power of UV 365 nm LEDs for capturing document images in UV light and verifying document authenticity by checking its security features in UV light.**

**Reading data from RFID chips.**

A compact document authenticator Regula 1120 is attached to the back side of any mobile device and connected to it via Bluetooth® LE. The authenticator is synchronized with a smartphone or tablet camera and allows verifying security features in UV light using the power of UV 365 nm LEDs.

Regula 1120.01 is also equipped with a module for reading RFID chips.

The mobile document authenticator Regula 1120 has its own rechargeable Li-Pol battery and draws no power from the attached mobile device.

**Features:**

- High-intensity UV 365 nm LEDs
- Interface — Bluetooth® LE
- Manual and automatic flash mode
- Micro-USB slot for charging
