

Document reader Regula 70X4M

Full page passport reader with no moving parts inside.

Automatic reading and authenticity verification of passports, IDs, visas, driver's licenses and other identification documents.

Optical character recognition, reading of barcodes, RFID and SmartCard chips.

A small-sized reader for desktop use. Hard plastic body. The device is connected to a PC via a USB cable. No moving parts. Reliable, convenient and easy-to-use.

The device allows capturing images in white, infrared, ultraviolet and coaxial lights. Certain models are equipped with modules for reading RFID chips and smart cards. The device is supplied with software development kit (SDK) for easy integration into existing end-user systems.

Reader Regula 70X4M can be optionally equipped with a flip-top cover.

Functionality

- Capturing and processing images
 - supported document formats
 - ID-1
 - ID-2
 - ID-3
 - other documents with maximum size 88×128 mm
 - automatic detection of a document in a scanning zone
 - automatic scanning after document detection
 - elimination of glare from laminate and holograms in white and IR light
 - compensation of external light hitting during image capture in ultraviolet light (*Smart UV*)
 - automatic selection of UV illumination intensity according to the document type
 - search and cropping of a document image from a general image
- The MRZ detection and recognition
- Recognition and reading of 1D and 2D barcodes
- Automatic recognition of a document type
- Processing graphic fields
- OCR of the visual zone
- Reading RFID tags
- Analyzing and comparing text data
- Automatic authenticity verification of a document

Operation

1. The optical reader automatically detects a document in the scanning area of the device.
2. Document images are captured in different illumination modes. At the same time data is read from RFID tags and smart cards.
3. **Regula Document Reader SDK** processes data.
4. Results of the verification are ready for further use.

Application

- Border control services
- Aviation security services
- Law-enforcement agencies
- Immigration services
- Financial institutions
- Hotels
- Car rental and leasing companies
- Cellular companies
- Business centers security service
- Event-agencies
- Medical institutions
- Tourist agencies
- Ticket offices

- Visa support agencies and consulates
- Insurance companies
- Casino security service

Additional functions

- A USB-port available for connecting other devices
- Programmable indicators of the device status:
 - multicolour LED indicator - red, yellow, green
 - buzzer

Delivery Set

- **Regula Document Reader SDK**
- USB cable for connecting the reader to a PC
- Optionally:
 - external power supply
 - scratch resistant glass (Sapphire)

Optical reader

- Scanning area, mm — 88×128: full passport page
- Video sensor:
 - type — CMOS
 - colour model — RGB
 - colour depth, bit — 24

| | Model | |
|----------------------|---|---|
| | 7024M.110-5A, 7024M.111-5A, 7034M.110-5A, 7034M.111-5A | 7024M.110-18, 7024M.111-18, 7034M.110-18, 7034M.111-18 |
| Number of megapixels | 5 | 18 |
| Resolution, ppi | 470 ± 5% | 860 ± 10% |
| Frame size, pixels | 2592×1944 | 4908×3684 |

Reader of radio frequency identification devices (RFID)

- Supported standards — ISO 14443: type A and B
- Data exchange rate, Kbaud — 106, 212, 424, 848
- Reading an RFID tag regardless of its position in the document
- Anti-collision: reading an RFID tag according to the MRZ

Smart card reader for model Regula 7034M

- Supported standards — ISO/IEC 7816-1, -2, -3, -4; EMV2000 4.1, Level 1
- Data exchange rate, Kbaud — 2-500
- Smart card type — asynchronous, T = 0 and T = 1

Device technical specifications

- Overall dimensions (length×width×height), mm:
 - **Regula 7024M** — 179×160×99
 - **Regula 7034M** — 190×160×99
- Weight, not more than, kg — 0,82
- Power supply voltage from a USB port, V — 5
- Power supply voltage from AC adapter (AC 100-240 V / DC 5 V) — optionally
- Scratch resistant glass (Sapphire) — optionally

Regulatory

- CE — RED, LVD & EMC
- EU WEEE, REACH & RoHs Directive
- FCC Part 15 Class B for **Regula 7024M.XXX-5A** and **7034M.XXX-5A**
- UL for **Regula 70X4M.XXX-5A**only

Climatic conditions

- Relative air humidity — 20...95% (non-condensing)
- Air temperature, °C — -10...+50
- IP51

Document reader software development kit (SDK)

SDK (**Full**) consists of three modules:

- Basic – supplied together with a device by default
- VizOCR – reading textual fields from a document page
- AAC – automatic authenticity control

VizOCR and AAC modules are optional and used to extend the functionality of Basic module.

Updates for SDK are provided regularly. Basic module has unlimited support. VizOCR and AAC are updated on subscription basis.

| Functionality | | Full SDK modules | | |
|--|---|-----------------------------|--------|-----|
| | | Basic (supplied by default) | VizOCR | AAC |
| Document image capture and processing | | | | |
| Document formats | <ul style="list-style-type: none"> • ID-1 (identity card) • ID-2 (passport card, visa) • ID-3 (passport) • other document formats up to 88x128 mm | + | | |

RFID-chip of the passport

Text data comparison of the passport

Graphic data comparison of the passport

The screenshot displays a software application for document analysis, specifically for a Korean passport. The interface is divided into several sections:

- Top Bar:** Includes 'File', 'View', 'Help', 'Disconnect', 'Process', 'Read RFD', 'Options', and 'Documents DB'.
- Left Panel:** Shows a preview of the passport document with several redacted sections (indicated by green boxes).
- Right Panel:** A detailed analysis pane with the following tabs:
 - Details:** Shows document information like 'PM', 'KOR', 'HONG KIL DONG', 'REPUBLIC OF KOREA', and '1234562'.
 - Visual zone:** Shows a grid of analysis results for 'IR 8500 ink' (ML2, HQ40509, HQ440509), 'UV' (ML2), 'Black element' (ML2), and 'IR transparency' (ML2).
 - RFID chip:** Shows a detailed view of the watermark area, with two large preview images of the sun-like watermark.
 - Text data comparison:** Shows a comparison of text data.
 - Graphic data comparison:** Shows a comparison of graphic data.
 - Security Features:** Shows a comparison of security features.
 - Messages log:** Shows a list of messages.

Security features of the passport

The screenshot displays a software interface for document analysis, specifically for passports. On the left, there are three panels showing the front page of a passport in different lighting conditions: 'WHITE', 'IR', and 'UV'. The main area is titled 'Details' and contains several tabs: 'Details' (selected), 'Documents Database (PDF)', 'MSZ', 'Visual zone', 'RFID-chip', 'Text data comparison', 'Graphic data comparison', 'Security Features', and 'Messages log'. A sub-menu under 'Security Features' shows 'Element A5' and 'Filling element'. Below this, there are sections for 'Elong image' and 'Image'. A checkbox for 'Images patterns' is checked, and 'Element A1' is selected with a 'Similarity' value of 97%. On the right, there is a large preview area showing the passport image with several green analysis overlays. The text 'KIL DO' is prominently displayed in large, bold, green letters across the preview. Below the preview, there are two smaller 'Elong image' sections and a 'Photo embedding type' section. The bottom right corner of the preview area shows a smaller version of the passport image with the text '01 M24403909 750101 HONG KIL DONG' and 'M24403909'.

Security features of the passport
